## RESQ FUNDS NOTES TO FINANCIAL STATEMENTS

September 30, 2025

#### 1. ORGANIZATION

The RESQ Dynamic Allocation Fund and the RESQ Strategic Income Fund (each a "Fund" and collectively the "Funds"), are each a diversified series of shares of beneficial interest of Northern Lights Fund Trust III (the "Trust"), a Delaware statutory trust organized under the laws of the state of Delaware on December 5, 2011. The Trust is registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as an open-end management investment company. The investment objective of the RESQ Dynamic Allocation Fund is to seek long term capital appreciation with capital preservation as a secondary objective. The investment objective of the RESQ Strategic Income Fund is to seek income with an emphasis on total return and capital preservation as a secondary objective. The Funds are "fund of funds" in that the Funds will generally invest in other investment companies.

The RESQ Dynamic Allocation Fund currently offers three classes of shares: Class A, Class C and Class I shares. The RESQ Strategic Income Fund currently offers Class A and I shares. Class A and Class I shares of each Fund commenced operations on December 20, 2013. Class C shares of each Fund commenced operations on October 17, 2014. As of January 8, 2025, Class C shares of the RESQ Strategic Income Fund were dissolved. RESQ Dynamic Allocation Fund Class A shares are offered at net asset value plus a maximum sales charge of 5.75%. RESQ Strategic Income Fund Class A shares are offered at net asset value plus a maximum sales charge of 4.75%. Class C shares of RESQ Dynamic Allocation Fund and Class I shares of the Funds are offered at net asset value. Each class represents an interest in the same assets of the applicable Fund and classes are identical except for differences in their distribution charges. All classes of shares have equal voting privileges except that each class has exclusive voting rights with respect to its service and/or distribution plans. Each Fund's income, expenses (other than class specific distribution fees) and realized and unrealized gains and losses are allocated proportionately each day based upon the relative net assets of each class.

### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies followed by the Funds in preparation of their financial statements. These policies are in conformity with generally accepted accounting principles in the United States of America ("GAAP"). The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates. The Funds are investment companies and accordingly follow the investment company accounting and reporting guidance of the Financial Accounting Standards Board ("FASB") Accounting Standards Codification Topic 946 "Financial Services – Investment Companies."

Operating Segments – The Funds have adopted FASB ASU 2023-07, Segment Reporting (Topic 280) - Improvements to Reportable Segment Disclosures ("ASU 2023-07"). Adoption of the standard impacted financial statement disclosures only and did not affect either Fund's financial position or the results of its operations. An operating segment is defined in Topic 280 as a component of a public entity that engages in business activities from which it may recognize revenues and incur expenses, has operating results that are regularly reviewed by the public entity's chief operating decision maker ("CODM") to make decisions about resources to be allocated to the segment and assess its performance, and has discrete financial information available. Each Fund's CODM is comprised of the portfolio managers and Chief Financial Officer of the Trust. Each Fund operates as a single operating segment. Each Fund's income, expenses, assets, changes in net assets resulting from operations and performance are regularly monitored and assessed as a whole by the CODM responsible for oversight functions of each Fund, using the information presented in the financial statements and financial highlights.

**Securities Valuation** – Securities listed on an exchange are valued at the last reported sale price at the close of the regular trading session of the primary exchange on the business day the value is being determined, or in the case of securities listed on NASDAQ at the NASDAQ Official Closing Price ("NOCP"). In the absence of a sale, such securities shall be valued at the mean between the current bid and ask prices on the day of valuation. Investments valued in currencies other than the U.S. dollar are converted to U.S. dollars using exchange rates obtained from pricing services. Short-term debt obligations having 60 days or less remaining until maturity, at time of purchase, may be valued at amortized cost.

**September 30, 2025** 

Valuation of Fund of Funds – The Funds may invest in portfolios of open-end or closed-end investment companies (the "underlying funds"). Underlying open-end investment companies are valued at their respective net asset values as reported by such investment companies. The underlying funds value securities in their portfolios for which market quotations are readily available at their market values (generally the last reported sale price) and all other securities and assets at their fair value by the methods established by the boards of the underlying funds. The shares of many closed-end investment companies, after their initial public offering, frequently trade at a price per share, which is different than the net asset value per share. The difference represents a market premium or market discount of such shares. There can be no assurances that the market discount or market premium on shares of any closed-end investment company purchased by a Fund will not change.

The Funds may hold investments, such as private investments, interests in commodity pools, other non-traded securities or temporarily illiquid securities, for which market quotations are not readily available or are determined to be unreliable. These investments will be valued using the "fair value" procedures approved by the Trust's Board of Trustees (the "Board"). The Board has delegated execution of these procedures to the advisor as its valuation designee (the "Valuation Designee"). The Board may also enlist third party consultants such as a valuation specialist at a public accounting firm, valuation consultant or financial officer of a security issuer on an as-needed basis to assist the Valuation Designee in determining a security-specific fair value. The Board is responsible for reviewing and approving fair value methodologies utilized by the Valuation Designee, which approval shall be based upon whether the Valuation Designee followed the valuation procedures established by the Board.

Fair Valuation Process - Applicable investments are valued by the Valuation Designee pursuant to valuation procedures established by the Board. For example, fair value determinations are required for the following securities: (i) securities for which market quotations are insufficient or not readily available on a particular business day (including securities for which there is a short and temporary lapse in the provision of a price by the regular pricing source); (ii) securities for which, in the judgment of the Valuation Designee, the prices or values available do not represent the fair value of the instrument; factors which may cause the Valuation Designee to make such a judgment include, but are not limited to, the following: only a bid price or an asked price is available; the spread between bid and asked prices is substantial; the frequency of sales; the thinness of the market; the size of reported trades; and actions of the securities markets, such as the suspension or limitation of trading; (iii) securities determined to be illiquid; and (iv) securities with respect to which an event that will affect the value thereof has occurred (a "significant event") since the closing prices were established on the principal exchange on which they are traded, but prior to a Fund's calculation of its net asset value. Specifically, interests in commodity pools or managed futures pools are valued on a daily basis by reference to the closing market prices of each futures contract or other asset held by a pool, as adjusted for pool expenses. Restricted or illiquid investments, such as private investments or non-traded securities are valued based upon the current bid for the security from two or more independent dealers or other parties reasonably familiar with the facts and circumstances of the security (who should take into consideration all relevant factors as may be appropriate under the circumstances). If a current bid from such independent dealers or other independent parties is unavailable, the Valuation Designee shall determine, the fair value of such security using the following factors: (i) the type of security; (ii) the cost at date of purchase; (iii) the size and nature of a Fund's holdings: (iv) the discount from market value of unrestricted securities of the same class at the time of purchase and subsequent thereto; (v) information as to any transactions or offers with respect to the security; (vi) the nature and duration of restrictions on disposition of the security and the existence of any registration rights; (vii) how the yield of the security compares to similar securities of companies of similar or equal creditworthiness; (viii) the level of recent trades of similar or comparable securities; (ix) the liquidity characteristics of the security; (x) current market conditions; and (xi) the market value of any securities into which the security is convertible or exchangeable.

The Funds utilize various methods to measure the fair value of all of their investments on a recurring basis. GAAP establishes a hierarchy that prioritizes inputs to valuation methods. The three levels of input are:

**Level 1** – Unadjusted quoted prices in active markets for identical assets and liabilities that the Funds have the ability to access.

**Level 2** – Observable inputs other than quoted prices included in level 1 that are observable for the asset or liability, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates and similar data.

September 30, 2025

**Level 3** – Unobservable inputs for the asset or liability, to the extent relevant observable inputs are not available, representing each Fund's own assumptions about the assumptions a market participant would use in valuing the asset or liability, and would be based on the best information available.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, for example, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety, is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The following tables summarize the inputs used as of September 30, 2025 for each Fund's investments measured at fair value:

#### **RESQ Dynamic Allocation Fund**

	Total	\$ 30,468,569	\$ -	\$ -	\$ 30,468,569

The Funds did not hold any Level 2 or Level 3 securities during the period.

**Security Transactions and Investment Income** – Investment security transactions are accounted for on a trade date basis. Cost is determined and gains and losses are based upon the specific identification method for both financial statement and federal income tax purposes. Dividend income is recorded on the ex-dividend date and interest income is recorded on an accrual basis. Purchase discounts and premiums on securities are accreted and amortized over the life of the respective securities using the effective interest method.

**Distributions to Shareholders** – Distributions from net investment income, if any, are declared and paid at least annually and are recorded on the ex-dividend date. The Funds will declare and pay net realized capital gains, if any, annually. The character of income and gains to be distributed is determined in accordance with federal income tax regulations, which may differ from GAAP. These "book/tax" differences are considered either temporary (i.e., deferred losses, capital loss carry forwards) or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the composition of net assets based on their federal tax-basis treatment; temporary differences do not require reclassification.

**Federal Income Taxes** – It is each Fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its taxable income to its shareholders. Therefore, no provision for federal income tax is required. The Funds recognize the tax benefits of uncertain tax positions only where the position is "more likely than not" to be sustained assuming examination by tax authorities. Management has analyzed the Funds' tax positions and has concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions taken on returns filed for open tax years 2022-2024 or expected to be taken in the Funds' 2025 tax returns. Each Fund identifies its major tax jurisdictions as U.S. federal, Ohio, and foreign jurisdictions where the Fund makes significant investments. Neither Fund is aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months. The Funds recognize interest and

penalties if any, related to unrecognized tax benefits as income tax expense in the Statements of Operations. During the period, the Funds did not incur any interest or penalties.

**Exchange Traded Funds** – The Funds may invest in exchange traded funds ("ETFs"). ETFs are a type of fund bought and sold on a securities exchange. An ETF trades like common stock and may be actively managed or represent a fixed portfolio of securities. The risks of owning an ETF generally reflect the risks of owning the underlying securities in which they invest, although the lack of liquidity on an ETF could result in it being more volatile. Additionally, ETFs have fees and expenses that reduce their value.

**Exchange Traded Notes** – The Funds may invest in exchange traded notes ("ETNs"). ETNs are a type of debt security that is linked to the performance of underlying securities. The risks of owning ETNs generally reflect the risks of owning the underlying securities they are designed to track. In addition, ETNs are subject to credit risk generally to the same extent as debt securities.

**Expenses** – Expenses of the Trust that are directly identifiable to a specific fund are charged to that fund. Expenses that are not readily identifiable to a specific fund are allocated in such a manner as deemed equitable, taking into consideration the nature and type of expense and the relative sizes of the funds in the Trust.

**Indemnification** – The Trust indemnifies its officers and Trustees for certain liabilities that may arise from the performance of their duties to the Trust. Additionally, in the normal course of business, the Funds enter into contracts that contain a variety of representations and warranties and which provide general indemnities. The Funds' maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Funds that have not yet occurred. However, based on experience, the Funds expect the risk of loss due to these warranties and indemnities to be remote.

**Cash and Cash Equivalents** – Cash and cash equivalents include cash and overnight investments in interest-bearing demand deposits with a financial institution with original maturities of three months or less. The Funds maintain deposits with a high quality financial institution in an amount that is in excess of federally insured limits.

#### 3. INVESTMENT ADVISORY AGREEMENT AND TRANSACTIONS WITH RELATED PARTIES

RESQ Investment Partners, LLC (the "Advisor"), serves as investment advisor to the Funds. Subject to the oversight of the Board, the Advisor is responsible for the management of each Fund's investment portfolio. Pursuant to an investment advisory agreement with the Trust, on behalf of each Fund, the Advisor directs the daily operations of each Fund and supervises the performance of administrative and professional services provided by others. As compensation for its services and the related expenses borne by the Advisor, each Fund pays the Advisor a fee, computed and accrued daily and paid monthly at an annual rate of 1.20% of each Fund's average daily net assets. For the year ended September 30, 2025, the Advisor earned advisory fees of \$429,071 and \$351,618 for the RESQ Dynamic Allocation Fund and RESQ Strategic Income Fund, respectively.

Pursuant to a written contract (the "Waiver Agreement"), the Advisor has agreed to waive a portion of its advisory fee and reimburse the Funds for other expenses until at least February 1, 2026 to the extent necessary so that the total operating expenses incurred by a Fund (exclusive of any front-end or contingent deferred loads, brokerage fees and commissions, acquired fund fees and expenses, borrowing costs (such as interest and dividend expense on securities sold short), taxes and extraordinary expenses, such as litigation expenses (which may include indemnification of Fund officers and Trustees, contractual indemnification of Fund service providers (other than the Advisor))) do not exceed the following:

RESQ Dynamic Allocation Fund	2.20%	2.80%	1.80%
RESQ Strategic Income Fund	2.20%	N/A	1.80%

September 30, 2025

If the Advisor waives any fee or reimburses any expense pursuant to the Waiver Agreement, and a Fund's operating expenses are subsequently less than the expense limitation, the Advisor shall be entitled to reimbursement by the Fund for such waived fees or reimbursed expenses provided that such reimbursement does not cause the Fund's expenses to exceed the expense limitation then in effect or in effect at time of waiver. If Fund operating expenses subsequently exceed the expense limitation, the reimbursements shall be suspended. The Advisor may seek reimbursement only for expenses waived or paid by it during the three years prior to such reimbursement; provided, however, that such expenses may only be reimbursed to the extent they were waived or paid after the date of the Waiver Agreement (or any similar agreement). The Board may terminate this expense reimbursement arrangement at any time upon 60 days' written notice to the Advisor. As of September 30, 2025, the total amount of expense reimbursement subject to recapture for the Funds were as follows:

In addition, certain affiliates of the Distributor provide services to the Funds as follows:

<u>Ultimus Fund Solutions, LLC</u> ("UFS") – UFS, an affiliate of the Distributor, provides administration, fund accounting, and transfer agent services to the Fund. Pursuant to a separate servicing agreement with UFS, the Funds pay UFS customary fees for providing administration, fund accounting and transfer agency services to the Funds.
